Art Unit: 1723

OFFICE ACTION

1. This application has been assigned to Technology Center 1700, Art Unit 1723 and the following will apply for this application:

- a. Please direct all written correspondence with the correct application serial number for this application to Art Unit 1723.
- b. Telephone inquiries regarding this application should be directed to the Technology Center 1700 receptionist at ~~(703)~~ 308-0651 or to the Examiner at ~~(703)~~ 308-0112. Official facsimile correspondence filed before a final office action should be transmitted to ~~(703)~~ 872-9310. Official facsimile correspondence which responds to a final office action should be transmitted to ~~(703)~~ 872-9311.
- c. Inquiries regarding application status, matching responses with applications, patent term questions, locating and retrieval of applications, incomplete office actions, requests for copies of office actions and/or references, requests to remail office actions, small/large entity status, or other administrative inquiries should be directed to the **Technology Center 1700 Customer Service Center** at ~~(703)~~ 306-5665.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. § 119, which papers have been placed of record in the file.

Art Unit: 1723

Information Disclosure Statement

3. Note the attached PTO-1449 form submitted with the Information Disclosure Statement filed 21 DEC 2001.

Drawings

4. The drawings are objected to under 37 CFR § 1.83(a) since the drawings must show every feature of the invention specified in the claims. Therefore, the following features must be shown or the features canceled from the claims. No new matter should be entered.
 - a. the subject matter of claim 12.
 - b. the subject matter of claim 13.
 - c. the subject matter of claim 14.
5. Applicant should verify that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).
6. If the above subject matter is to be shown, Applicant is required to submit a proposed drawing correction in response to this Office Action. Any proposal by the applicant for amendment of the drawings to cure defects must include a print or pen-and-ink sketch showing changes in *red ink* in accordance with MPEP § 608.02(v).

Art Unit: 1723

IMPORTANT NOTE: The filing of new formal drawings to correct the noted defect may be deferred until the application is allowed by the examiner, but the print or pen-and-ink sketch with proposed corrections shown in red ink is required in response to this Office Action, and *may not be deferred*.

Specification

7. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
8. The disclosure is objected to because of the following informalities:
 - a. terms such as "minimised" throughout the specification should be revised to reflect customary U.S. spelling.

Appropriate correction is required.
9. The abstract is acceptable.
10. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (MPEP 606.01).

Claim Rejections - 35 U.S.C. § 112, second paragraph

11. Claims 6-10 and 12-14 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1723

Claim 6: all occurrences of "the base" lack antecedent basis - change to --the base part--.

Claim 12 is vague and incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The structural cooperative relationship between the warning means and the other recited elements is lacking.

Claim 13 is vague and incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The structural cooperative relationship between the recited securing means and the other recited elements is lacking.

Claim 13: all occurrences of "the cover" lack antecedent basis - change to --the cover part--.

Claim 14 is vague and incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The structural cooperative relationship between the interlock means and the other recited elements is lacking.

Art Unit: 1723

12. Each pending claim should be thoroughly reviewed such that these and any other informalities are corrected so the claims may particularly point out and distinctly claim the subject matter which applicant regards as the invention, as required by 35 U.S.C. § 112, second paragraph.

Claim Rejections - 35 U.S.C. § 102

13. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

14. Claims 1-9 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by Jones (USP 2,321,144).

The patent to Jones (USP 2,321,144) discloses a centrifuge comprising a housing with a base part 14 and a cover part 28; rotor 13 mounted on spindle 22; circumferential restraining surface (the flange area of the rotor just below 41 in Fig. 2 where the component parts of the rotor are joined); annular axially extending abutment 24 overlying the restraining surface which is detachably secured to the base via elements 25 at a flange portion thereof and which has a radially inwardly directed flange overlying the restraining surface (Fig. 2); the spindle having a first stub axle (above 22) and a second stub axle 31.

Art Unit: 1723

Claim Rejections - 35 U.S.C. § 103

15. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

16. Claim 12 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Jones (USP 2,321,144) in view of Brimhall (USP 5,665,047).

Jones (USP 2,321,144) does not disclose the warning means. Brimhall (USP 5,665,047) discloses a centrifuge having a rotor 30 mounted for rotation within housing 12. A cover 14 of the centrifuge has warning means in the form of a window 11. would have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to have provided the centrifuge of Jones (USP 2,321,144) with warning means such as a window as disclosed by Brimhall (USP 5,665,047) for the purpose of allowing the operator to view the inside of the centrifuge (Col. 3, lines 24-28).

Art Unit: 1723

Allowable Subject Matter

17. Claims 10, 13, and 14 would be allowable if rewritten to overcome the rejection under 35 U.S.C. § 112 and to include all of the limitations of the base claim and any intervening claims.

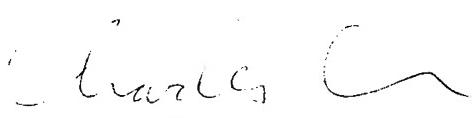

Conclusion

18. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

19. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Charles Cooley whose telephone number is ☎ (703) 308-0112.

20. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is ☎ (703) 308-0651.
